

Recreation Advisory Commission Report – July 2015

Budget Update

The FY 15 budget has been completed. At this time, all accruals and year end statements are being paid. A more complete budget analysis will be discussed at the September meeting.

An FY 16 budget update will be given at the September meeting as well.

County Strategic Plan

Recently the Board of Supervisors adopted their Strategic Plan which will guide operations and decision making for the entire County. Moving forward, Parks, Recreation and Facilities will seek to better align itself with these goals and objectives. The good news is that much of what has been adopted, we've been doing and steadily implementing for close to 5 years.

Each RAC report will provide a snapshot of how the Department is meeting all of the goals. Here is the first serving;

Strategic Goals:

- 1. Efficient, Effective, and transparent government. Emphasis on customer service excellence.**
 - a. Recently GYAA hosted two large state softball tournaments. Ben Solomon and his crew were recognized by GYAA for their tremendous efforts in preparing and maintain the fields for the duration of the tournament.
- 2. Balanced development that contributes to the welfare of the community and preserves its rural character.**
 - a. The Fall 2015 Program Guide features photographs of recreation occurring throughout Goochland's past.
- 3. Excellence in financial management.**
 - a. Parks and Recreation recently eclipsed (once again) its revenue projections for the 6th straight year.
- 4. High quality core services.**
 - a. As evidenced by the continued growth in program registrations and revenues despite offering less overall programming. Demand is high for a reason.
- 5. Positive work environment with highly qualified and diverse staff.**
 - a. Current members of the maintenance department are pursuing grounds management certificates.

Capital Improvement Update

*Leakes Mill Park – *Update* - Phase 2 of Leakes Mill Park is fully underway! Dewberry Engineers have met with County staff and are close to submitting the 35% drawings of the engineered site plan for the additional soccer playing space and parking lot addition.*

The concession stand construction is underway at Leakes Mill Park. Thus far the well has been drilled to a depth of 500 feet and hydrofracked in an effort to establish a solid water source. The footings for the concession stand have been completed as well as the plumbing lines. The concession stand should be under roof within the next week.

Volunteers have been working feverishly to construct additional multi-purpose trails on the northern stretch of the park. It is estimated that they have installed close to two miles worth of additional trails including bridge crossings over the creeks that are located in that area of the park. Over 100 volunteer hours have been spent on the trail project thus far. The County has been providing tools and materials to assist their efforts.

Scheduled for the fall will be our signage installation (as part of Phase 2). Staff are working on trail maps and interpretive signs for the park specific to its history and environment. Sign completion and install is scheduled for mid-September.

We have met with Dewberry, Inc to discuss the early development of the engineered drawings for phase 2 of Leakes Mill Park. The early drawings include an additional 38 spaces as well as an oversized playing surface. After the initial meeting, some changes will be made, specifically to the playing surface's grading.

The concession stand permitting has been completed. The well, drain field, food/health department permitting has been completed. The project is currently being reviewed by the Building Official. Once permitted, construction can begin on the concession stand. Once the concession stand breaks ground, an expected completion is 6-8 weeks.

At the February Board of Supervisors meeting, the Board voted 4-1 to approve the purchase order to begin the construction of the concessions and restroom facility for Leakes Mill Park. The approved contracted amount was for \$77,500 including a \$10,000 allowance for any change orders.

Three Goochland based companies were solicited for quotes. Legacy Homes, LLC won the bid and construction is slated to begin on February 1, 2015. A meeting with the contractor has been held and preliminary steps have been taken to begin the construction process.

Before construction begins, the drain field will need to be designed and the well drilled to establish the water system for the restrooms and concession stand. The contractor will be responsible for both as well as acquiring the appropriate building permits. Completion is expected to take 8-9 weeks weather permitting.

The design phase of phase 2 for Leakes Mill Park is underway as well. Dewberry, LLC met with the County in late November to begin the design process. A full survey of the property will be the first step taken by the hired agency to begin design services. More to come on this.

At the October Board of Supervisors meeting, the Board voted 4-1 to award design services for Phase 2 of Leakes Mill Park to Dewberry and Associates. The first meeting with Dewberry is tentatively scheduled for November 14th, 2014 where we will lay out the process for the design.

An invitation for bid (IFB) was sent out to three local contractors for the Phase 2 concessions and restroom building construction on November 7th. The IFB included all necessary specifications as well as the building plans for construction. A two week turnaround time was desired for responses. This work will go to the Board of Supervisors for award either in December or January. It is anticipated that construction will be completed in time for the spring soccer season at Leakes Mill Park.

The Department is working towards awarding a contract to one of our on call engineering firms to begin the design process of the phase 2 portion of Leakes Mill Park. All four engineering firms were contacted seeking proposals for those services and met with me on site to assess.

We received responses from 3 firms, ranging from \$42,000 - \$58,000. The award of the contract is scheduled to go to the Board of Supervisors at their October meeting. The scope of services includes all design work for the construction of an oversized soccer pad, measuring 120 yards by 90 yards. Additionally, 40 additional parking spaces will be included.

In December, the hope is to take the concession stand and restroom proposals to the Board of Supervisors to award that work as part of Phase 2 as well. The hope is to begin construction in January on that portion of the facility so that it may be open for Spring 2015. The concession stand construction drawing has been completed and include a small concession operation area and flushing restrooms.

The irrigation and well design as well as the finalized turf establishment will be handled separately by the County in order to save funds for the overall project.

Leakes Mill Park phase 1 is finally complete. The last playground element was installed in late May. Erosion and sediment control measures were completed by Maintenance Division staff in June.

As a recap, Phase 1 included the construction of two full sized, fully irrigated multipurpose fields. The fields consist of 20 sprinkler zones, with 3 sprinkler heads per zone, each pushing 10 gallons of water per minute. Fueling these zones is a 300 foot well which yields 26 gallons per minute. A 2.5 horsepower well pump is encased adjacent to the well head. The fields are a patriot Bermuda grass base and are over seeded in the fall with rye grass in order to maintain a year round green.

In addition to the fields, an 88 space parking area was completed as well as the main entrance to the park off of Route 6. Two playgrounds were installed, one large unit for 5-12 year olds and a 2-5 year olds unit. Each playground was purchased on clearance to maximize tax dollars.

A 1.5 mile trail loop was completed in May of 2014. In an effort to save money, the County used existing staff, GPS equipment, and the Department of Forestry to lay the trail out. Maintenance staff cut the existing trail utilizing rented equipment. The trail surfacing was outsourced to a landscaping and tree company.

It should be noted that through the use of grants, timbering revenue, and savings identified by Parks, Recreation & Facilities, that the total cost of construction for phase 1 was approximately \$721,000. Of that \$721,000, the County expended approximately \$257,000 of actual County money. In addition to

the actual cost of construction, the Department also identified approximately \$95,000 in savings through the use of naming rights in exchange for services, completing contracted tasks in house, and by negotiating price reductions with service providers. Essentially a \$816,000 project was completed for \$257,000. A savings of \$559,000, or 68%. For every dollar spent on the project, the County spent 32 cents.

Leakes Mill Park Phase 2 - Per the County's adopted CIP plan for FY 15, additional monies moving forward are identified for use on Leakes Mill's phase 2 developments. Approximately \$585,000 remains for that development. Included in the proposed phase 2 development are additional fields, design services and fees, a concession and restroom facility, additional irrigation infrastructure, and parking.

*West Creek Trails - * Update* - VDOT has approved the Land Use Permit for the County to appropriately utilize the termination of Tuckahoe Creek Parkway as the southernmost trail head for the West Creek Trail development.*

Parks and Recreation has had subsequent meetings with the apartment complex regarding the location of the access trail from the sidewalk on the northern end near Wawa. The apartments have had some concern that the trail was too close in proximity to its apartment buildings. The County and the apartments worked together to identify an alternative path that would push the trail down into some floodplain along the Tuckahoe Creek. It would move the trail 30 feet to the east of its proposed location on the water and sewer easement.

At this time, surveying of the alternative trail has been scheduled. Once that is complete, the County will move forward with platting the entire water and sewer easement onto one existing plat so that the finalized written agreement with the landowner is ready for review.

Three companies have been solicited for proposals to delineate all of the wetlands through the proposed trail system. This wetland delineation is needed to allow the County to identify potential trail crossings as well as to get appropriate notification and approval through the Army Corps of Engineers. A low bid has been obtained and the delineation will be completed soon.

Lots of movement on the West Creek Trails! The County is working to establish the trailheads at both the north and the southern ends of the trail system. The northern trailhead is being developed at the Broad Street pump station located across from Wawa. The trail will be accessed by walking along the access road to the sidewalk on Broad. Then the user would have to traverse the sidewalk along Broad into the trail system located behind the new apartment complex.

The second trail head is being developed at the terminus of Tuckahoe Creek Parkway, located across from the HCA emergency room. At this time, the County is working with VDOT on the appropriate permitting to allow the trail head to be developed.

Simultaneously, the County Attorney's office has been working with P and R to obtain and develop the plats that would reflect the recreation easement. Once the written agreement is ratified between the land owner and the County, additional work on the trail can begin. Timmons, Inc, has been obtained to perform all necessary wetland delineations so that the trail can be constructed.

A maintenance agreement is currently being worked on between VDOT and the County for use of the trail heads. Additionally, the County Attorney's office is finalizing an agreement to move forward with the project.

We have met with VDOT officials to discuss utilizing the stub of the Tuckahoe Creek Parkway as a potential trailhead for the southern portion of Leg 2 of the trail system. That meeting went very well. At this time we are still working with the land owner on final approval.

Additionally, we have met with the Army Corps of Engineers to assess potential wetland impacts and any mitigation that may need to take place. The ACE was very supportive of the project and indicated that we would need to delineate wetlands prior to any improvements. Acquiring engineering services for this work will take place after all written agreements are in place with the land owner. No county funds will be committed until that takes place.

As part of the County's FY 15 CIP plan, \$50,000 was identified by the Board of Supervisors to be allocated to be used for east end trail development.

At this time, the County has entered into a verbal agreement with a landowner and developer in the far eastern portion of the County to develop a linear park. Tentatively titled "West Creek Trails," the proposed trail system would begin at the new apartment complex across from the Wawa on Broad Street. The trail system would utilize an existing utilities easement that runs parallel to Tuckahoe Creek. Phase 1 of the development calls for a 2.65 mile linear trail system that crosses the creek and terminates at the HCA Emergency Center.

Preliminary talks with the apartment developer include the potential construction of the trail being completed by the developer, leaving the allocated CIP money for trail head development to include parking, signage, and boardwalk crossings. This is still very up in the air as agreements with the interested parties need to be completed.

*Central High School - * Update * - The security measures for the gymnasium have been completed. This includes new security doors, 24 hour surveillance cameras, additional lighting, and audible rear door alarms.*

The restrooms in the gymnasium portion of the building have been completed. New entry doors and security measures are being installed as well. Additionally, electrical work, tree work, and field improvements have been made to the facility as well.

The Central High School committee has met twice thus far and have begun looking into potential future uses for the structure.

The grand re-opening of the CHS gymnasium is scheduled for Saturday, January 24th, 2015 at 9:30 a.m. The current renovations include a new playing surface in the gym, new HVAC systems for that portion of the building, updated lighting, new paint for the lobby and front classroom, and tile flooring for the lobby area.

Future work will include bathroom renovations, new front doors, and additional security measures for that portion of the building. Treatment of the water system is also a priority.

Since the conclusion of the first public meeting related to the future of the Central High School building, several developments have occurred. Since the meeting, several open houses have taken place to give citizens the opportunity to tour the building.

Also, several groups have offered their own opinions and plans in writing. It is expected that a more clear path related to the future of the building will materialize at the November 18th meeting.

At this time Parks, Recreation & Facilities is lining up contractors to begin work on the gymnasium in the event a decision is made. Contracted work will include HVAC replacement to all roof top units, reworking the gymnasium floor, bathroom improvements, and aesthetic improvements to the lobby. Work in other portions of the building will come in the future.

The public meeting related to the future of the Central High School building was held on Monday, September 8th at 7 p.m. in the Administration board room. 4 options related to the building were discussed, with 2 potential options remaining on the table. At this time, the two options are trying to keep the old building fully intact and the second option of targeted demolition and restoration. Future meetings on the discussion will be scheduled.

\$500,000 has been earmarked in the County's CIP plan for the Central High School complex. At this time, the County has not released a finalized plan of what will take place at the site. For months the County has sought citizen input. That information can be given per request.

Parks, Recreation, & Facilities recognize the site's value from an interior and exterior value. County users already utilize the playing surfaces and walking trails. The gymnasium could be renovated and used to house the Department's ever growing programming base, more specifically the basketball program. It should also be noted that the site is identified in the Parks and Recreation Master Plan for adaptive reuse.

It is anticipated that a potential plan for the building and the site could be made public by late fall.

*Mathews Park – * Update* - Parks and Recreation has been working with one of the on call engineering firms (VHB) to design and develop a parking lot plan for the access to Mathews Park. At this time, the initial construction documents have been developed and reviewed.*

Additionally, Parks and Recreation staff has met with the adjacent property owner to ensure that the development will be friendly and that the park will be a good neighbor. Some concerns expressed by the adjacent landowner was the proposed original location of the parking lot as well as hunting on the property. Based upon their concerns, the parking lot location was shifted away from their property to ensure additional privacy. The County has also agreed to post appropriate signage on site to warn park users of the "end of park property."

The County also has to work through an existing easement on the Mathews Park property for the landowner who owns land to the rear of the park. This is not expected to be an issue.

Once the construction documents are fully completed, the parking lot construction will be bid. Once the lowest responsive bidder is awarded, then construction can begin. Once the parking lot is constructed, the playground install will be scheduled as will the trail system.

At the April 13th 2015 Board of Supervisors meeting, the Board approved an appropriation of \$25,000 to begin work on Mathews Park. An additional \$50,000 is pending for July 1, 2015. For now, the Department will procure the playground for the park as well as seek out engineering services for the parking lot construction.

The playground was purchased from Play and Park Structures at a significant discount. The playground will be purchased and held in storage until the parking lot construction is completed. At that time, the playground will be professionally installed. The playground itself is suitable for 25-30 kids, ages 2-12.

VHB, one of the County's on call engineers, has been tasked with designing, permitting, and helping to coordinate construction of the ten space parking lot. The design shouldn't take too long and could potentially be put out to bid in early July.

On October 30, 2014, Ms. Lascolette, District 1 Supervisor, held a meeting regarding the future of the proposed Mathews Park site. Several citizens and County stakeholders attended the meeting including Betsy Wright, District 1 RAC member.

After quality discussion, the group determined the best course of action for Mathews Park. At this time, Parks, Recreation & Facilities will work with Schools to open the Byrd multipurpose room 2 times per week for open gym basketball. Additionally, Mathews will proceed with development with a 10 space gravel parking lot, picnic shelter, trails, and a playground. The Goochland High School CTE program will work on shelter construction. Any savings identified in the Mathews project will be utilized to upgrade the baseball field behind Byrd Elementary School.

At this time, all funding for the Mathews Park development is earmarked for FY 16. It was stated that those funds may be allocated a year early to allow for quicker development. Ms. Lascolette plans to unveil this plan at her soon to be scheduled March town hall meeting.

At this time we are researching possible requirements for erosion and sediment controls as well as all necessary permitting prior to any work being completed or attempted at the Mathews site. Currently, a finalized plan of what will be housed there is to be determined. Stay tuned.

The County's CIP does call for FY 16 funds totaling \$75,000 to be used for a park development off of Mathews Road. At this time, the amenities on site have yet to be determined. The Mathews Road site was identified in the Parks and Recreation Master Plan adopted and subsequently amended in 2010.

*Tucker Park - * Update* - Parks and Recreation has begun working with the Timmons Group on a site plan for the boat launch. Once the site plan is completed, the boat launch project can be bid to the lowest responsive bidder.*

Timmons will be handling the design of the ramp as well as all necessary permitting through the appropriate state agencies.

Some additional good news on Tucker Park...County staff met with representatives of LL Bean in June and discussed their company bringing their Outdoor Adventure Schools to Goochland. This effort would coincide with their grand opening in Short Pump Town Center.

The Outdoor Adventure Schools would include introductory programming associated with kayaking, canoeing, fly fishing, stand up paddle boarding, and archery. These programs are designed to recruit new business and sustain existing business for their company. Registration for their programs would go directly through their website. Use of Tucker Park would be mutually agreed upon through a written agreement and a flat fee paid per calendar year. LL Bean would also become an interested corporate partner in the continued development of the site.

LL Bean's Outdoor Adventure programs typically bring in 1,000 participants per location, many from well outside the general area.

At the June 2015 Board of Supervisors meeting, the Board will be considering a \$10,000 appropriation to construct a non motorized boat ramp on the eastern side of Tucker Park. The appropriation is contingent upon the Friends of Goochland Parks putting \$5,000 of remaining grant monies toward the project as well. Early estimates on the boat ramp engineering are approximately \$5,500. This will include all necessary permitting.

As you may recall, the Department was able to procure free of charge, improvements to an existing roadbed as well as a 10 space parking lot on the eastern side of the park to provide access to a future boat ramps. The estimated cost of the work if performed by the County was \$15,000 - \$20,000. The eastern side has sat unused or over 2 years.

In addition to the boat ramp, the County has been working to identify ways to improve entry and exit to the park so that larger special events can be pursued. At this time, the Department will be working to install an emergency access road so that traffic can be more quickly removed from 522.

Non Parks and Recreation Projects (Upcoming) – Courthouse Complex Stairs, Interior Painting of the Courthouse, Courthouse Column Repair, Parking Lot Sealing (Multiple Locations), Roof Replacement – Academy, HVAC Replacement – Academy

Programming Review & Preview

FY 15 Totals

Registration – 1,683 (1,535 FY 14), 10% increase

Revenue - \$167,355.21 (\$141,882.99 FY 14), 18% increase

Summer Camp

820 registrations (628 last year), 24% increase

ACTIVE GVA

Adult Volleyball Ages: 16 and up

Come play volleyball at the Goochland Sports Complex Gym on Sundays. Check County website, Department Facebook, and at the gym if schedule does change.

Goochland Sports Complex Gym FREE

Tucker's Tots

Tucker's Tots Ages: 3-4

All of our class curriculum addresses beginning intellectual, social, emotional and physical development. This is done by teaching basic academic concepts-letters, sounds, reasoning, sequencing, classifying numbers & counting. Demonstrating responsible emotional behaviors, developing physical skills & coordination. Learning social skills and character education working with weekly themes and discovery play. All children must be toilet trained, ages are 3 to 4 years 11 months. The Arts Academy is located at 2938 River Road West, adjacent to the Courthouse Complex.

Baseball Lessons Ages: At least 6 but less than 18

For the first time, Goochland Parks & Recreation is pleased to offer individual baseball lessons taught by former college baseball players, and local GYAA baseball coaches, Chris Williams (JMU) and Tim Williams (VMI), with prize 1924. Lessons are focused on building the essential skills for baseball progression. Tailored around the skill level and experience of the player, sessions include skill-specific drills, conditioning, baseball application and some baseball history, all designed to reinforce and enhance player development. Schedule will be made by the parent and Chris Williams once child is registered. Half hour session is \$25 and an hour session is \$40. Five half hour sessions are \$110 and five hour sessions are \$185. Coaches Chris and Tim Williams have coached for years in the area and pride themselves in introducing college-level techniques to train young athletes and better prepare them for competition. It is their personal philosophy that the earlier the athlete is exposed to monitored, high-

level training, the better. Choose from the following individual skills, or work with the coaches to design a program to include multiple skills to develop the overall baseball player: Pitching, Catching, Fielding (Infield Fielding & Outfield), Hitting (includes bunting), Base running. About the instructors: Coaches Chris and Tim Williams were both highly recruited for Division I baseball and football. While Coach Tim played both baseball and football in college and had successful careers in each, including all-conference, multiple player of the week selections, and other honors, Coach Chris focused specifically on baseball and held the single season hits (singles) record for several years at JMU, received all conference honors, and was named to the "All Virginia Baseball Team" along with players from UVA, VA Tech, ODU, VCU, and UR standout and MLB star, Sean Casey.

ACLS Ages: 14 and up

This course is for healthcare professionals who either direct or participate in the management of cardiopulmonary arrest or other cardiovascular emergencies. This includes personnel in emergency response, emergency medicine, intensive care and critical care units such as physicians, nurses, and paramedics, as well as others who need an ACLS course completion card for job or other requirements. This course emphasizes the importance of basic life support CPR to patient survival, the integration of effective basic life support with advanced cardiovascular life support interventions, and the importance of effective team interaction and communication during resuscitation. Simulated clinical scenarios encourage active, hands-on participation through learning stations where students will practice essential skills individually, as part of a team, and as a team leader. Realistic simulations reinforce the following key concepts: proficiency in basic life support care, recognizing and initiating early management of periarrest conditions, managing cardiac arrest, identifying and treating ischemic chest pain and acute coronary syndromes, recognizing other life-threatening clinical situations (such as stroke) and providing initial care, ACLS algorithms, and effective resuscitation team dynamics. If you only need a

recertification course for ACLS, you can just come for Day 2. Please let the Department know when you register.

Heart Savers CPR/AED Ages: 14 and up

Skills are taught using AHA's research-proven Practice-While-Watching technique, which allows Instructors to observe students, provide feedback and guide students' acquisition of skills. Modular format creates course flexibility. Ideal for learners who prefer group interaction and feedback from an instructor while learning skills. Each student receives the highest quality course materials to supplement their learning. Skills practice and testing included during course to ensure students demonstrate competency performing skills. This course is for anyone with limited or no medical training who needs a course completion card in CPR/AED to meet job, regulatory or other requirements.

Nurse Aid Program Ages: 16 and up

The Royal Career Institute's Nurse Aide Program is a Virginia Board of Nursing approved course. It consists of a minimum of 80 hours of didactic training and 40 hours of clinical practical training. Graduates will be eligible to take the National Certification Exam for initial recognition as a Certified Nursing Aide. The NA curriculum consists of didactic and clinical components designed to enable the student to accomplish the program's terminal objectives. The curriculum is designed to instill the knowledge and skills needed to care for those whose lives depend on others in order to meet their daily needs as well as the human responses and needs of individuals with illness. The training program uses the curriculum provided by the Virginia Board of Nursing. The purpose of the Nurse Aide Program is to prepare the student to be able to provide exceptional, high quality and compassionate care for patients

and residents in any health care setting where CNA's are hired. In addition the program aims to prepare the student to work with other members of the health care team to improve patient care and clinical outcomes. The program emphasizes knowledge development beyond that of entry-level Nurse Aide programs by including coursework in patient safety and human factors, quality assessment and improvement, interdisciplinary teamwork, and Professional Development Training.

Upon completion of the Nursing Aide Training Program, the graduate will: 1. Describe the functions of body systems appropriate to the nursing assistant scope of practice. 2. Describe the roles and responsibility of nursing assistants including ethics, communication, legal responsibilities, abuse laws, and Virginia State Board of Nursing regulations. 3. Demonstrate professional communication skills including recording and reporting, and legal and ethical responsibilities. 4. Demonstrate safety and infection control practices that comply with standards of practice for nursing assistants. 5. Identify stages of growth and development. 6. Define common medical terms and abbreviations used in health care. 7. Demonstrate competence and proficiency in the following categories of skills:

a. Communication and interpersonal relationships. b. Safety and infection control. c. Personal care procedures. d. Vital signs. e. Nutritional requirements and techniques. f. Admission, transfer, and discharge procedures. g. Exercise and activity. h. Elimination. i. Unsterile warm and cold applications. j. Care to clients with special needs. k. End of life care. l. Care to clients with cognitive impairment. m. Comply with privacy and confidentiality laws. n. Demonstrate behaviors consistent with professional work ethics. o. Adhere to the policies and procedures of clinical sites. 8. All graduates of the Nursing Aide Training Program will be eligible to take the National Nurse Aide Assessment Program Exam.

Special Events

July 4th Recap – The fireworks were a hit! Over 14,000 people attended this year’s event. The 15 minute show received rave reviews by the public. This year’s vendor was Dominion Fireworks, a local vendor out of Petersburg, VA.

The cost of the fireworks was approximately \$13,500 and the use of Sheriff’s Deputies was estimated at \$5,000 for a total cost to the County of \$18,500.

We typically research the impact on local vendors to see how the event impacted them in terms of business. Staff has not had a chance to investigate this yet but typical responses from business that are open see an increase of 40% +. Great job to everyone!
